

# How would you like an immediate 30% raise without changing jobs?

It's easy. All you have to do is start telling the truth.

And telling the truth starts with getting familiar with the letter and intent of the US income tax laws and having the willingness to obey the law, for a change. Most people, unwittingly, do not obey the tax laws because they are uninformed, or worse, misinformed, as to what type of activities the US income tax laws apply to. The US is one of the few countries, if not the only country, where the income tax is by necessity an indirect excise. This fact has a significant, profound implication that directly affects everyone.

If you work in the private sector, then more than likely, the activity you do to earn money is not an excise-taxable (privileged) activity. Learn the truth about the income tax, and begin obeying the tax laws. It will help you. It will help your country. And it will help the global economy.
