

The IRS received this letter on May 20, 2023 according to the Certified Mail green card; however, when I called in October, they denied they received anything from me, see next letter.

SSN: [REDACTED]

Tax Period: 2022

Dear S. C. McHenry:

I received your letter dated April 27, 2023 requesting additional information in order to accurately process my 1040 tax return.

*My 2022 1040 was accompanied by an IRS Form 4852 for both of my employers. As you are aware, Form 4852 serves as a substitute for Form W-2 and is completed by taxpayers when an employer has either not provided a W-2, or has issued a W-2 that is not correct. The W-2s which I received from my employers, and which the IRS has also received, contains erroneous information. I do not know why Electric Boat and The William Backus Hospital reported my payments as taxable income since they are not based on the IRC Title 26 USC Section 3401(a) and Section 3121(a).*

None of the forms you are requesting in your letter apply to my tax situation except for the W-2s which you have already received from the Electric Boat Corporation and The William W. Backus Hospital. Additionally, I cannot intentionally furnish you with any document which contains erroneous information, which is the case with both of the W-2s that I received.

I hope this clears up any questions you may have related to my 2022 tax return. You have received all appropriate documents to make a complete return and I am looking forward to this matter being resolved.

*Thank you for being so thorough in processing my 2022 tax return.*

Best Regards,

[REDACTED]

Julie Ann Marien
